📄 PROFILE

I am a highly skilled and experienced Data Analyst and Software Developer. With a strong background in both fields, I offer a unique combination of analytical prowess and technical proficiency.

As a data analyst, I excel in extracting valuable insights from complex datasets and translating them into actionable recommendations. I have a solid understanding of statistical analysis, data visualization, and machine learning techniques. Whether it's conducting exploratory data analysis, creating insightful reports, or developing predictive models, I am committed to delivering accurate and meaningful results that drive business success.

My proficiency as a web developer allows me to transform data-driven insights into visually appealing and user-friendly web applications. With a strong command of HTML, CSS, and JavaScript, I can build interactive and responsive websites that effectively communicate information and engage users.

I look forward to working with your Company.
